Creating the Table

```
cqlsh> use hwkeyspace;
cqlsh:hwkeyspace> CREATE TABLE logs (
            ... log_id UUID,
            ... app_id TEXT,
            ... log_level TEXT,
            ... message TEXT,
            ... time_stamp TIMESTAMP,
            ... PRIMARY KEY ((app_id), log_level, time_stamp)
            ... );
cqlsh:hwkeyspace> SELECT * FROM logs;

 app_id | log_level | time_stamp | log_id | message
--------+-----------+------------+--------+---------
```

The Results of the Queries

```
cqlsh:hwkeyspace> SELECT * FROM logs;

 app_id | log_level | time_stamp                      | log_id                               | message
--------+-----------+---------------------------------+--------------------------------------+--------------------------------
 app123 |     DEBUG | 2024-12-01 10:15:00.000000+0000 | 00a040a3-1747-43b6-b27b-18241922ffd0 |            Fetching user data
